

Sunteck Realty Ltd (“Sunteck”) is partnering with the International Finance Corporation (IFC), a member of the World Bank Group, on accelerating the adoption of green building practices through the promotion of voluntary green building certification programs based on the EDGE (“Excellence in Design for Greater Efficiencies”) software, standard, and certification system.

Sunteck Realty Ltd and IFC are establishing a framework for greater collaboration in pursuit of their shared aspirations to move the construction industry on to a lower-carbon, more resource-efficient path.

To this end, Sunteck’s endeavour to catalyze and has already completed seven EDGE pre-certifications in the first year of this announcement. This currently accounts for more than 80% of the volume of Sunteck’s projects during the first year.

IFC will provide Sunteck Realty Ltd with an education session on the principles and applications of the EDGE software, standard, and certification system.

Sunteck Realty Ltd will strive to promote sustainable design practices, and jointly with IFC will strive to present the benefits of using the EDGE software, standard, and certification system at mutually agreed conferences, seminars, and other events, and through papers, articles, or research.
